DETAILED ACTION

Allowable Subject Matter

1. Claims 1-19, and 21 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The instant application is directed to an electronic controlling apparatus. Each independent claim identifies the uniquely distinct combination of features including "reproduction controlling means for controlling an electronic device for reproducing said content and the electronic device at a destination by said communicating means to reproduce said content from a position corresponding to said information indicating the reproduction position stored by said storing means and allow said content to be used at the electronic device at said destination when said destination detecting means detects that said user has moved." This patentable distinction is included in all independent claims 1, 10, 19, and 21. The closest prior art, Shigetomi et al. (US 2002/0150380) and Daniels (US 2002/0048448). Shigetomi et al. disclose information reproducing apparatus and method of same which includes making sure a viewer watches commercial broadcast information contained in broadcast information, and Daniels discloses pausing the display of a television program as a signal including the television program is received comprising a time shifting event recorder receives a time sequential signal representing an event through an antenna, cable or the like. The references, either singularly or in combination, fail to anticipate or render the above limitations obvious.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
